Welcome to the European Blockchain Center - Empowering Industry and Society
Vision of European Blockchain Center

Being the globally leading institution that understands, creates, and realizes Blockchain-based solutions in a cross-industry and cross-disciplinary private public partnership to generate value for society.
Developing Your Capabilities

• Participate and benefit from the portfolio rolled out at the European Blockchain Center (EBC).

• EBC has hosted several blockchain courses for executive leaders like Blockchain Economics for Business, Blockchain Academy Network, and Blockchain Business Bridge.
Accelerating Next Generations Talents

• Meet and inspire university students specialising in blockchain systems at the IT University of Copenhagen.

• Become a guest speaker or a case company for semester projects, master theses, international blockchain school, or hackathons.
Educating the Experts of Tomorrow

- **Digital Economy specialisation:** Developing students' blockchain skills for the Danish market.

- **International Blockchain School:** Attracting international competencies to accelerate business models.

- **Blockchain Student Group:** Supporting student-initiated blockchain projects.
Leading Blockchain Research

• **Blockchain Governance**: researching incentives, accountability and decision rights in blockchain systems.

• **Ledgerlytics**: uncovering network movements and analysing code quality.

• **Blockchain Ethics**: designing and governing blockchain systems based on European values.

• **Blockchain Business Models**: teaching decentralised business opportunities.
